

Large Scale Oligos

Our scalable and high-quality oligo synthesis offer makes us an ideal partner for your industry applications. Let us increase your production efficiency!

Getting oligonucleotides on time and in the right amount is one of the actual challenges in the Biotech industry. Plan your requirements with us and get your order delivered fast, on time and in the amount you need. Benefit from our express production that delivers small scale oligos in less than 24h. Large scale turnaround times start from 10 days. We keep our promises, just tell us your needs.

What you can expect from our large-scale products

- Flexible yields from μg to g according to your requirements.
- HPLC purification guarantees highest purity and a reliable end product.
- Various quality control steps ensure best-in-class products are delivered.
- Delivery format according to your needs, e.g. lyophilised or in concentration adjusted solution as prepacked kits, bottles, tubes or plates.
- Flexible dye/quencher combinations for qPCR probes for R&D and diagnostic purposes including license free and cost-efficient solutions for commercial kits.
- An ISO 13485 compliant manufacturing built for your industry needs.
- The right answers and solutions from our consulting and support team.
