EUROFINS GENOMICS – YOUR TRUSTED PARTNER WITH PROVEN RECORD

THE SIMPLER PROJECT, UPPSALA UNIVERSITY

From SIMPLER cohorts, Eurofins Genomics successfully extracted 38,000 samples and ran 40,500 samples on GWAS microarray during a one-year period.

"We are very happy with Eurofins' competence and professional approach" commented Anna-Karin Kolseth, Project Coordinator at SIMPLER.

OUR FUTURE HEALTH, UK

Eurofins Genomics has been awarded a contract to genotype up to five million samples on Illumina array across four years for Our Future Health, making this the largest genotyping project to date.

LOW-PASS SEQUENCING FOR "TOP-20 PHARMACEUTICAL COMPANY"

Automated aliquoting of DNA from 17,000+ samples of Cohort biobanking plates into appropriate PCR plates for downstream NGS application, Shallow Sequencing or low-pass sequencing with guaranteed average data amount across all samples performed on Illumina NovaSeq in three months.
