

Eurofins Genomics announces the successful completion of the acquisition of Weatherbys Scientific, with operations in Ireland and Australia

[Ebersberg, Germany / Dublin, Ireland, 24th June 2026] – Eurofins Genomics announces the acquisition of Weatherbys Scientific, with operations in Ireland and Australia. The acquisition strengthens Eurofins Genomics' offering in the animal genomics space and further expands its footprint in important international markets.

With extensive experience in genetic testing and strong customer relationships, particularly in livestock testing and the Irish market, the acquisition of Weatherbys Scientific complements Eurofins Genomics' existing capabilities, including its high-throughput array-based genotyping platform in Denmark, one of Europe's largest array-based genomics platforms with established capabilities in animal genotyping.

By combining Weatherbys Scientific's local market expertise in Ireland and Australia with the capabilities of Eurofins Genomics' international laboratory network, and its advanced array capabilities and broad portfolio in sequencing and genotyping, customers will benefit from scalable, reliable and efficient genomic testing services.

Weatherbys Scientific's genomics operations became part of the Eurofins Genomics network upon completion of the transaction on 15th June 2026.
