**\*Central Submission Days (please mark samples accordingly):**

11.11./09.12.2019

13.01./17.02./16.03./20.04./11.05./15.06./13.07./17.08./14.09./12.10./16.11./07.12.2020

Please note: samples for the central submission days need to be in the lab on the mentioned date latest. Hair samples will routinely only be processed at the central submission days.

All prices without tax. Please see our General Terms and Conditions.

Sampling and Submission:

We recommend, especially for valuable sires, the submission of EDTA blood (1 - 3 mL). The submission of sperm samples as well as hair roots (15 - 20 pieces) is subject to surcharge (EUR 4.00 per animal). Please note that the submission of hairs can potentially affect the analysis' quality as dirt, saliva and hairs from other animals can adulterate the result. Additionally, less roots on the hairs can hamper the analysis. The stronger the hairs and the roots the better. Please be very careful during sampling and clean the sampling equipment after every animal! Please mark the samples according to your order form.

Please send the samples to:

**Eurofins Genomics Europe Applied Genomics GmbH  
Anzinger Str.7a, 85560 Ebersberg, Germany**

Usually the results are available within seven working days; IGENITY profiles need up to three weeks.
